Education

Information Technology

09/2022 - Present

Hanoi University of Business and Technology

GPA: 3.02/4.0

Skills

Hard Skills

- Website Development & Customization
- API & System Integration
- E-commerce
- Git/GitHub, Docker

Soft Skills

- Problem-Solving Mindset
- Independent Work Capability

Objective

Short-term: To become a Shopify Developer capable of independently deploying and taking full ownership of projects, from initial requirements gathering to practical operation.

Long-term: To participate in shaping technical solutions and creating products that deliver clear value to the business. My overarching goal is to continuously develop my professional expertise in parallel with problem-solving skills, taking responsibility and making a long-term contribution to the company.

Work experience

Shopify Developer

01/2026 - 07/2026

WEHUB Co., Ltd.

- Responsible for the development and operation of the Shopify website for the Kumoo Leather brand.
- Built APIs and a synchronization system for products, inventory, and orders between Shopify and Nhanh.vn.
- Customized themes, optimized User Experience (UX), and handled technical requirements on the Shopify platform.
- Managed the Shopify channel, monitored website activities, and resolved operational issues as they arose.

FREELANCE DEVELOPER

05/2022 - Present

Self-employed / Freelance

- Developed websites, APIs, and tools tailored to clients' practical requirements.
- Analyzed requirements, proposed solutions, and directly executed projects from development and testing through to final handover.
- Integrated APIs and built tools to support data processing, automate workflows, and connect multiple systems.

E-COMMERCE / DROPSHIPPING

07/2024 - 12/2025

Self-employed / Freelance

- Operated a Dropshipping business targeting the US market.
- Executed and optimized Facebook Ads campaigns to generate direct orders on the website.
- Tracked advertising performance, customer behavior, and conversion rates to optimize products, content, and the website overall.
- Gained practical, end-to-end experience in the e-commerce workflow, spanning product sourcing, website management, traffic generation, conversions, and order fulfillment.

Certifications

01/2026 TOEIC LR

Projects

Shopify Developer 01/2026 - 07/2026

Kumooleather.vn

- Built and deployed the kumooleather.vn website on Shopify, managing the process from initial setup to live operation.
- Directly managed, maintained, and resolved technical issues for the website.

Web Developer 04/2026 - 06/2026

Giftcoupony.com

- Built a full-stack e-commerce platform encompassing a customer-facing website, an admin dashboard, and a backend API.
- Developed using Next.js, NestJS, PostgreSQL, Prisma, and Redis; successfully deployed and maintained in a production environment.
- Developed the order processing flow, integrated SePay/USDT payments, and automated digital product delivery, while concurrently managing products, SKUs, and inventory.
- Implemented security protocols including Two-Factor Authentication (2FA), data encryption, audit logs, system monitoring, and alerting.

Developer 03/2026 - 05/2026

SHOPIFY - NHANH.VN Synchronization System

- Engineered a webhook connection between Shopify and Nhanh.vn via API.
- Synchronized and verified data across products, SKUs, inventory levels, and orders.
- Continuously checked inventory to minimize data discrepancies during daily operations.
- Automated scheduled synchronization tasks and successfully processed data for a high volume of SKUs.
